Abstract

This package fixes caption problems with other-than-centered aligned longtables.
(solves \LaTeX\ PR tools/3387)

*This package has version number v1.4-94.
# The user interface

The content of \caption in longtables is usually centered to the content of the longtable itself. This is sufficient for centered longtables, but for left or right aligned longtables this results in captions moved into the left or right page margin.

To solve this problem just include this package after the \longtable package[1], e.g.:

\usepackage{longtable,ltcaption}

Afterwards the captions of all longtables should be aligned as expected, even for not-centered longtables.

## Further justification

\LTcapskip
This length is controlling the skip between the caption and the contents below the caption (which is usually the longtable contents if you place the caption above the longtable), and it can be altered with \setlength{LTcapskip}{...}. When the \ltcaption package is loaded it will be set to abovecaptionskip which usually represents the skip between caption and contents in floating environments. (Without this package, the \longtable package uses \baselineskip here.)

\LTcapleft\LTcapright
You can alter the centering of the caption box (of width \LTcapwidth) by setting the lengths \LTcapleft & \LTcapright to appropriate values. These are set to \fill by default, just like the values \Lleft & \Lright.

\LTcapmarginsfalse
Another option is the usage of the command \LTcapmarginsfalse which makes the \ltcaption package using the values \Lleft & \Lright instead of \LTcapleft & \LTcapright.

Note: If the \ltcaption package will be used with one of the NTG document classes[2], \CaptionLabelFont & \CaptionTextFont will not only be used for figure & table captions, but for longtable captions as well.

Note: These lengths & commands do not work when the \ltcaption package is used with one of the KOMA-Script document classes scrartcl, screeprt, or scrbbook[3], or used with the memoir document class [4]. The KOMA-Script resp. memoir settings for captions are used instead. Same with the caption package which also uses its own options and settings.

## Bonus features

\LTcaptype
As a bonus feature this package patches the \longtable package so \LTcaptype will be used internally instead of the fixed caption type ‘table’. So for example this code snipped:

\renewcommand\LTcaptype{figure}
\begin{longtable}{ll}
\caption{An example longtable}\\
A & B \\
\end{longtable}

will result in a longtable like this:

---

Figure 7: An example longtable

...
Another bonus feature is the addition of the environment \texttt{longtable*} which does not increment the \texttt{table} counter. (As a consequence, \texttt{caption} is not available for such longtables, but \texttt{caption*} still is.)

\section{Spot the difference}

Without the \texttt{ltcaption} package:

\begin{table}[h]
\centering
\begin{tabular}{llll}
\hline
\textbf{Table 1}: & Left aligned & longtable & left aligned \\
& longtable & left aligned & longtable \\
& left aligned & longtable & \\
\hline
\end{tabular}
\caption{This is only a test}
\end{table}

\begin{table}[h]
\centering
\begin{tabular}{llll}
\hline
\textbf{Table 2}: & Right aligned & longtable & right aligned \\
& longtable & right aligned & longtable \\
& right aligned & longtable & \\
\hline
\end{tabular}
\caption{This is only a test}
\end{table}

\begin{table}[h]
\centering
\begin{tabular}{llll}
\hline
\textbf{Table 3}: & Centered & longtable & centered \\
& longtable & centered & longtable \\
& centered & longtable & \\
\hline
\end{tabular}
\caption{This is only a test}
\end{table}

With the \texttt{ltcaption} package (and the default value of \texttt{\LTcapwidth}):

\begin{table}[h]
\centering
\begin{tabular}{llll}
\hline
\textbf{Table 4}: & Left aligned & longtable & left aligned \\
& longtable & left aligned & longtable \\
& left aligned & longtable & \\
\hline
\end{tabular}
\caption{This is only a test}
\end{table}

\begin{table}[h]
\centering
\begin{tabular}{llll}
\hline
\textbf{Table 5}: & Right aligned & longtable & right aligned \\
& longtable & right aligned & longtable \\
& right aligned & longtable & \\
\hline
\end{tabular}
\caption{This is only a test}
\end{table}

\begin{table}[h]
\centering
\begin{tabular}{llll}
\hline
\textbf{Table 6}: & Centered & longtable & centered \\
& longtable & centered & longtable \\
& centered & longtable & \\
\hline
\end{tabular}
\caption{This is only a test}
\end{table}
With the `ltcaption` package and `\LTcapwidth=`:\

<table>
<thead>
<tr>
<th>Table 7: Left aligned longtable left aligned longtable left aligned longtable left aligned longtable</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is only a test</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Table 8: Right aligned longtable right aligned longtable right aligned longtable right aligned longtable</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is only a test</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Table 9: Centered longtable centered longtable centered longtable centered longtable</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is only a test</td>
</tr>
</tbody>
</table>

With the `ltcaption` package and `\LTcapleft=0pt` resp. `\LTcapright=0pt`:

<table>
<thead>
<tr>
<th>Table 10: Left aligned longtable left aligned longtable left aligned longtable</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is only a test</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Table 11: Right aligned longtable right aligned longtable right aligned longtable right aligned longtable</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is only a test</td>
</tr>
</tbody>
</table>

With the `ltcaption` package and `\LTcapleft=\tabcolsep` resp. `\LTcapright=\tabcolsep`:

<table>
<thead>
<tr>
<th>Table 12: Left aligned longtable left aligned longtable left aligned longtable</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is only a test</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Table 13: Right aligned longtable right aligned longtable right aligned longtable right aligned longtable</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is only a test</td>
</tr>
</tbody>
</table>
With the \caption package and \LTcapmarginsfalse:

Table 14: Left aligned longtable left aligned longtable left aligned longtable
This is only a test

Table 15: Right aligned longtable right aligned longtable right aligned longtable
This is only a test

Table 16: Centered longtable centered longtable centered longtable centered longtable
This is only a test
